

Supplementary Figure S2. Evaluation of cell signatures. Gene signature was evaluated using the xCell software. The cells are as expected mainly of a B-cell signature (average xCell-score 0.96 ± 0.002). Secondary cell signatures include neutrophils (average xCell-score 0.73 ± 0.03) and dendritic cells (DC; average xCell-score 0.61 ± 0.03).
